Election/Restriction

The response to the restriction requirement submitted on August 1, 2002 (paper no.16) is acknowledged. In view of applicant's argument, the restriction requirement set forth on July 2, 2002 (paper No.15) has been withdrawn. However, a new restriction requirement is established as followed:

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, and 9, drawn to robot having an effecting end with no variable axis, classified in class 318, subclass 568.21.
 - II. Claims 3-8, and 11-16, drawn to robot's tool with variable axis, classified in class 700, subclass 159.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group II has separate utility such as machining work piece with variable sizes. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3661

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
